CONTENTS OF VOLUME 33

AHMAD, IBRAHIM, LEELAHANON, SITTISAK AND LI, QI. Efficient estimation of a semiparametric partially linear varying coefficient model 258–283

AMEMIYA, YASUO AND PAPADOPOULOS, SAVAS. Correlated samples with fixed and nonnormal latent variables 2732–2757

ANGERS, JEAN-FRANÇOIS AND KIM, PETER T. Multivariate Bayesian function estimation 2967–2999

ARRATIA, RICHARD, GOLDSTEIN, LARRY AND LANGHOLZ, BRYAN. Local central limit theorems, the high-order correlations of rejective sampling and logistic likelihood asymptotics 871–914

ASGHARIAN, MASOUD AND WOLFSON, DAVID B. Asymptotic behavior of the unconditional NPMLE of the length-biased survivor function from right censored prevalent cohort data 2109–2131

AVERKAMP, R. AND HOUDRÉ, C. Wavelet thresholding for nonnecessarily Gaussian noise: Functionality 2164–2193

BALAN, R. M. AND SCHIOPU-KRATINA, I. Asymptotic results with generalized estimating equations for longitudinal data 522–541

BARAUD, YANNICK, HUET, SYLVIE AND LAURENT, BÉATRICE. Testing convex hypotheses on the mean of a Gaussian vector. Application to testing qualitative hypotheses on a regression function 214–257

BARTLETT, PETER L., BOUSQUET, OLIVIER AND MENDELSON, SHAHAR. Local Rademacher complexities 1497–1537

BERGER, JAMES O., STRAWDERMAN, WILLIAM AND TANG, DEJUN. Posterior propriety and admissibility of hyperpriors in normal hierarchical models 606–646

BHATTACHARYA, RABI AND PATRANGENARU, VIC. Large sample theory of intrinsic and extrinsic sample means on manifolds—II 1225–1259

BHATTACHARYYA, B. B., LI, X., RICHARDSON, G. D. AND BOISSY, Y. Parameter estimates for fractional autoregressive spatial processes 2553–2567

BLANCHARD, GILLES AND GEMAN, DONALD. Hierarchical testing designs for pattern recognition 1155–1202

BOISSY, Y., BHATTACHARYYA, B. B., LI, X. AND RICHARDSON, G. D. Parameter estimates for fractional autoregressive spatial processes 2553–2567

BOSE, ARUP AND CHATTERJEE, SNIGDHANSU. Generalized bootstrap for estimating equations 414–436

BOSE, MAUSUMI, RAGHAVARAO, DAMARAJU AND SHAH, KIRTI R. Universal optimality of Patterson's crossover designs 2854–2872

BOUSQUET, OLIVIER, MENDELSON, SHAHAR AND BARTLETT, PETER L. Local Rademacher complexities 1497–1537
CAI, JIANWEN AND ZENG, DONGLIN. Asymptotic results for maximum likelihood estimators in joint analysis of repeated measurements and survival time 2132–2163
CAI, T. TONY AND LOW, MARK G. Nonparametric estimation over shrinking neighborhoods: Superefficiency and adaptation..... 184–213
CAI, T. TONY AND LOW, MARK G. On adaptive estimation of linear functionals 2311–2343
CAI, T. TONY AND LOW, MARK G. Nonquadratic estimators of a quadratic functional..... 2930–2956
CHATTERJEE, SNIGDHANSU AND BOSE, ARUP. Generalized bootstrap for estimating equations..... 414–436
CHENG, CHING-SHUI AND TANG, BOXIN. A general theory of minimum aberration and its applications..... 944–958
CHERNOZHUKOV, VICTOR. Extremal quantile regression 806–839
CHIAROMONTE, FRANCESCA, LI, BING AND ZHA, HONGYUAN. Contour regression: A general approach to dimension reduction 1580–1616
CLAYTON, MURRAY K. AND LIN, PEI-SHENG. Analysis of binary spatial data by quasi-likelihood estimating equations..... 542–555
COHEN, ARTHUR AND SACKROWITZ, HAROLD B. Decision theory results for one-sided multiple comparison procedures..... 126–144
COHEN, ARTHUR AND SACKROWITZ, HAROLD B. Characterization of Bayes procedures for multiple endpoint problems and inadmissibility of the step-up procedure 145–158
CRAIU, RADU V. AND MENG, XIAO-LI. Multiprocess parallel antithetic coupling for backward and forward Markov chain Monte Carlo..... 661–697
CUI, HENGJIAN AND ZUO, YIJUN. Depth weighted scatter estimators 381–413
DALALYAN, ARNAK. Sharp adaptive estimation of the drift function for ergodic diffusions..... 2507–2528
DAVIES, P. LAURIE AND GATHER, URSULA. Breakdown and groups 977–988
DAVIES, P. LAURIE AND GATHER, URSULA. Rejoinder 1016–1035
DELGADO, MIGUEL A., HIDALGO, JAVIER AND VELASCO, CARLOS. Distribution free goodness-of-fit tests for linear processes..... 2568–2609
DETTE, HOLGER, MELAS, VIATCHESLAV B. AND PEPELYSHEV, ANDREY. Optimal designs for three-dimensional shape analysis with spherical harmonic descriptors..... 2758–2788

DRYDEN, IAN L. Statistical analysis on high-dimensional spheres and shape spaces 1643–1665
EFROMOVICH, SAM. Estimation of the density of regression errors 2194–2227
EINMAHL, UWE AND MASON, DAVID M. Uniform in bandwidth consistency of kernel-type function estimators 1380–1403
FANG, KAI-TAI, LI, RUNZE, SUDJIANTO, AGUS AND ZHANG, AIJUN. Majorization framework for balanced lattice designs 2837–2853
GALLEGOS, MARÍA TERESA AND RITTER, GUNTER. A robust method for cluster analysis 347–380
GASSER, T., STUDER, M. AND SEIFERT, B. Nonparametric regression penalizing deviations from additivity 1295–1329
GATHER, URSULA AND DAVIES, P. LAURIE. Breakdown and groups 977–988
GATHER, URSULA AND DAVIES, P. LAURIE. Rejoinder 1016–1035
GELMAN, ANDREW. Analysis of variance—why it is more important than ever 1–31
GELMAN, ANDREW. Rejoinder 46–53
GEMAN, DONALD AND BLANCHARD, GILLES. Hierarchical testing designs for pattern recognition 1155–1202
GENOVESE, CHRISTOPHER R. AND WASSERMAN, LARRY. Confidence sets for nonparametric wavelet regression 698–729
GENTON, MARC G. AND LUCAS, ANDRÉ. Discussion 988–993
GOLDSTEIN, LARRY, LANGHOLZ, BRYAN AND ARRATIA, RICHARD. Local central limit theorems, the high-order correlations of rejective sampling and logistic likelihood asymptotics 871–914
GU, CHONG AND MA, PING. Optimal smoothing in nonparametric mixed-effect models 1357–1379
GUERRE, EMMANUEL AND LAVERGNE, PASCAL. Data-driven rate-optimal specification testing in regression models 840–870
HALL, PETER AND HOROWITZ, JOEL L. Nonparametric methods for inference in the presence of instrumental variables 2904–2929
HALL, PETER AND KANG, KEE-HOON. Bandwidth choice for nonparametric classification 284–306
HALL, PETER AND VAN KEILEGOM, INGRID. Testing for monotone increasing hazard rate 1109–1137
HALL, PETER AND YAO, QIWEI. Approximating conditional distribution functions using dimension reduction 1404–1421
HAMPEL, FRANK. Discussion 993–998
HE, XUMING. Discussion 998–1000
HEDAYAT, A. S. AND YANG, MIN. Optimal and efficient crossover designs for comparing test treatments with a control treatment 915–943
